## Existing General Animal Notes

Animal ID: 301586

Type: Dog

Breed: Labrador

Name: Mia

Entry Date/Time	Category	Notes
6/27/2025 12:55:24 PM	Supervisor/Manager Notes	<p>Voicemail from AO sister Sarah [REDACTED] stating the dog is not aggressive and her sister over reacted and wanted to come get the dog. I advised we cannot reclaim to Sarah since she is not the AO but I can approve her to adopt the dog. Sarah said she will bring her sister Amber [REDACTED] with her to reclaim the dog then rehome to her. I advised they would need to be in by 5:30pm today and she said they would head here now.</p> <p>Okay to reclaim to Amber [REDACTED] who surrendered dog yesterday.</p>
6/27/2025 12:42:15 PM	Ownership Notes	Sister of Sarah [REDACTED] called wanting to reclaim the dog saying it is not aggressive. I sent her to management.
6/27/2025 11:03:45 AM	Rounds Review	Rounds recognizes that there was a bite, it did not break skin and therefore, there is no bite quarantine needed. Rounds recommends humane euthanasia due to displayed unpredictable and aggressive behavior to people as reported by the animal owner.
6/26/2025 4:28:52 PM	Ownership Notes	<p>Contacted HomeAgain for chip # [REDACTED]</p> <p>That chip is attached to the following pet:            Pet Name:Mia            Sex:F            Spayed/Neutered:Y            Pet Date of Birth:4 years old</p> <p>Owner information on Microchip Account            PRIVACY FLAG ON THE ACCOUNT:(YES or NO)-</p> <p>Owner Name:Justin [REDACTED]</p> <p>[REDACTED]</p> <p>Implant facility:Banfield Pet Hospital            Phone Number:NA            Lot #:E034282            Microchip Sold Date: 4/12/2021</p>
6/26/2025 3:14:04 PM	Animal Care Notes	<p>AO arrived with dog stating she needed to surrender the dog and refused to take it back as there were kids in the home and she was dangerous.</p> <p>AO stated her son had the dog on a walk, someone the dog knew (refused to tell me the persons name or relation to the family) walked up and was talking with the son, Mia then attacked the man unprovoked by biting him on the arm. She said it didn't break skin that she knew of but didn't see his arm. She was in the house and ran out when she heard people yelling, she assumed Mia had attacked the neighbors dog since she tries to attack other dogs.</p> <p>AO refused to take dog back or look into rehoming resources. I advised based on the history she has provided humane euthanasia is the likely outcome for the dog. AO understood and would like to be contacted for private cremation.</p>
6/26/2025 2:59:40 PM	Ownership Notes	Surrendering AO reports that today her son stopped to speak with someone while walking the dog. While they were talking the dog suddenly bit the person and the person left before AO's son could ask if the bite broke skin or not. However her son reports that he did not see

any blood or marks from the bite. Encouraged AO to call us if she is able to locate the person who was "bitten" or learns any new info.

AO states that the dog has been increasingly aggressive toward people and has always been aggressive toward other animals.

If this animal is euthanized, AO would like to collect the ashes. Provided info on that process.

12/27/2023 8:52:03 AM	Ownership Notes	OC letter returned as new address. [REDACTED]
12/16/2023 10:30:13 AM	Behavior Notes	Dog seemed extremely scared and nervous in kennel and continued barking out of fear. Tossed her some treats which she readily took and then tried to solicit more treats from me but then once I stopped giving her treats she continued to bark.
12/15/2023 4:55:18 PM	Ownership Notes	Amber [REDACTED] and stated this is her dog. She cannot make it for redemption tonight but will be out tomorrow 12/16 to reclaim. Advised to bring proof of ownership for unmicrochipped dog, leashes, ID, and advised of hold date.  Taking off ID trace as owner knows dogs are here.
12/15/2023 4:48:04 PM	Ownership Notes	Spoke to Justin [REDACTED], said he rehomed to Amber [REDACTED]. Said he fwded all of the OC stuff we sent him to Amber and she knows of the situation, said Amber was planning to come and reclaim and that she had said Mia escaped.  Called HomeAgain 888.466.3242 to check on chip [REDACTED]  That chip is attached to the following pet: Pet Name: Mia Sex: Spayed/Neutered: Yes Pet Date of Birth: 12/29/2020  Owner information on Microchip Account PRIVACY FLAG ON THE ACCOUNT: NO Owner Name: Justin [REDACTED] [REDACTED]

Oct 28 2023 9:11AM PR states that her neighbor has two golden retrievers that are outside all the time. There is no shelter and frequently no food or water. PR has tried speaking to the neighbors, but they don't open the door. The neighbor's yard is roughly 10x20.

Oct 28 2023 9:13AM \*\*\*\*Anon [REDACTED]

Oct 28 2023 10:31AM 10.28.23 Approx. 1015 I arrived at K#. I first walked around back and observed a very healthy looking Golden Retriever and Lab type dog laying on the concrete patio quietly in the sun. There was a full bowl of both food and water laying next to the sliding glass door. The patio appeared completely clean. I saw no dog houses however there was a significant overhang present from the upstairs unit. Both dogs got up and began to bark. I walked around to the

front, knocked and was greeted by AMBER [REDACTED]. I explained the complaint. AMBER strongly stated that the dogs, "Mia," and "Pup" are house dogs. MIA confirmed the dogs do spend a lot of time out on the patio because that is where they prefer to be. AMBER stated she lets the dogs out when they want to and in when they want to. AMBER stated the dogs are always kept in at night, when they are not home and when the weather is really bad. I thanked AMBER and departed. Complaint closed.

- Dog- Fear

The dog that you are adopting has either a history of fearful behavior in their previous home or we have observed the dog exhibiting fearful behavior in the shelter environment. With proper intervention this behavior can be managed in their new home.

#### Why are dogs fearful?

Some dogs experience a lack of socialization during their critical puppy development periods and may display more fearful behavior in new situations. This behavior can be seen as avoidance, fearful body postures and growling. These experiences can cause the dog to avoid interactions with new people, dogs or other novel stimuli. Sometimes dogs exhibit fairly normal behavior within the environment, but avoid certain types of interaction with people that are new to them. They require a trusting relationship to be comfortable with odd interactions like hugging or raucous play. A risk that any fearful dog can pose is that, when forced to interact with a stimulus (person, dog, new situation) they can react defensively and growl, snap or bite to try to make the scary thing go away. These behaviors need to be managed to help prevent the development of further reactivity. Not every home environment is appropriate for a shy dog; your adoption counselor will help you evaluate your particular situation.

How do I help my dog with its fearful behavior?

\* Understand your dog's threshold. Your dog has a threshold under which they are still able to make good decisions and learn new behaviors. Once they reach their threshold it is best to remove them from the situation and allow them to calm down before working with them again. Once they are back under threshold, the situation may still be challenging for them but it can help to build confidence, reduce stress and help to form positive associations for them.

\* Pay attention to what your dog is saying. Every dog has a progression of behaviors that can build up to an unmanageable level of fear. Knowing when your dog is approaching an uncomfortable point is necessary to help them to either avoid the stimulus or practise calming behavior.

\* Desensitizing and counterconditioning are great tools to teach dogs that scary people or situations are not as frightening as they feel they are. Use treats or wet food to slowly acclimate your dog to the stimulus. Start with the stimulus in a non-threatening form (such as a picture of another dog, or a strange person at a distance). Gradually increase exposure to the stimulus until the dog is comfortable and not expressing any fearful behaviors. By rewarding the dog each time it makes a good decision about the scary stimulus, it will gradually become less and less scary and the dog will begin to have positive associations with it.

\* Make sure to communicate to visitors to your home or strangers on the street how to properly interact with your dog. If it is going to cause your dog too much stress, or they have not progressed to a point in their training where it would be beneficial to the dog, remove them from the situation and do not force an interaction.

What if my adopted dog shows fear in the new home?

We are here to help if your newly adopted dog shows fearful behavior in your home.
